

SERVICE PORTFOLIO · ASSURANCE SUPPORT (NON-STATUTORY)

Risk, Internal Audit & Controls

Internal audit, controls and assurance support that strengthen governance without overlapping the statutory auditor.

Service proposition

Boards and CFOs need independent assurance that risks are understood and controls actually work. TAG delivers risk-based internal audit, controls design and testing, and forensic reviews — building practical frameworks that improve operations, not just tick boxes. Our scope is explicitly non-statutory.

When you need us — and who it's for

Business situations that trigger the need

- The board or audit committee wants independent assurance over key risks
- Internal financial controls (IFC/ICFR) need design or testing
- A process is leaking value, margin or cash
- Fraud indicators or a specific incident need investigation
- ERP or automated controls need review
- Vendor, inventory or fixed-asset integrity is in question

Who this service is for

- Audit committees and boards
- CFOs and finance leaders
- Promoters seeking assurance over operations
- Groups standardising controls across entities

Detailed scope of assistance

Internal audit

- Risk-based internal audit
- Operational and process reviews
- Remediation monitoring

Controls

- Internal Financial Controls (IFC)
- ICFR and SOX advisory
- Risk-control matrices
- Control design and testing
- SOPs, process manuals and delegation-of-authority frameworks

Enterprise risk

- Enterprise risk management
- Regulatory compliance reviews
- IT general controls and ERP/automated controls

Forensic & verification

- Fraud-risk assessment
- Forensic and special-purpose reviews
- Inventory and fixed-asset verification
- Payables and transaction verification
- Third-party and vendor-risk reviews

Engagement approach

01

Plan

Build a risk-based audit plan aligned to the board's priorities.

02

Test

Assess design and operating effectiveness of controls and processes.

03

Report

Deliver clear, prioritised findings with practical recommendations.

04

Remediate

Track remediation and re-test to confirm risks are closed.

Typical deliverables

- Risk-based internal audit reports
- Risk-control matrices and control libraries
- IFC/ICFR design and testing documentation
- SOPs and process manuals
- Forensic / special-purpose review reports
- Remediation trackers

Selected experience & credentials

Partners have governed 290 controls under Korean SOX and the Companies Act, coordinated statutory audits to clean outcomes, and hold ICAI certification in forensic accounting and fraud detection.
