

ASSURANCE SUPPORT (NON-STATUTORY)

Risk, Internal Audit & Controls

Internal audit, controls and assurance support that strengthen governance without overlapping the statutory auditor.

Overview

Boards and CFOs need independent assurance that risks are understood and controls actually work. TAG delivers risk-based internal audit, controls design and testing, and forensic reviews — building practical frameworks that improve operations, not just tick boxes. Our scope is explicitly non-statutory.

Scope of assistance

Internal audit

- Risk-based internal audit
- Operational and process reviews
- Remediation monitoring

Controls

- Internal Financial Controls (IFC)
- ICFR and SOX advisory
- Risk-control matrices
- Control design and testing
- SOPs, process manuals and delegation-of-authority frameworks

Enterprise risk

- Enterprise risk management
- Regulatory compliance reviews
- IT general controls and ERP/automated controls

Forensic & verification

- Fraud-risk assessment
- Forensic and special-purpose reviews
- Inventory and fixed-asset verification
- Payables and transaction verification
- Third-party and vendor-risk reviews

Typical deliverables

- Risk-based internal audit reports
- Risk-control matrices and control libraries
- IFC/ICFR design and testing documentation
- SOPs and process manuals
- Forensic / special-purpose review reports
- Remediation trackers

Experience

Partners have governed 290 controls under Korean SOX and the Companies Act, coordinated statutory audits to clean outcomes, and hold ICAI certification in forensic accounting and fraud detection.
